

GIACOMO SPADA

AI PRODUCT ENGINEER

I'm a designer-builder who owns AI products end-to-end, from initial research and design through to technical implementation. Focused on local LLM and conversational AI, and interfaces that make complex data usable. Currently building clinical AI for chronic disease management, but broadly interested in digital health, AIoT tech, and automation that actually solves problems.

WORK EXPERIENCE

JUNIOR SCIENTIST (AI PRODUCT ENGINEER) -
UNIVERSITY OF TWENTE
MAY 2026 - PRESENT

- Architected EMERALD, a TRL-5 clinical AI health coach for chronic disease management.
- Built an end-to-end local RAG pipeline (Python, ChromaDB, Llama-3.1 8B) compliant with the EU AI Act.
- Engineered automated data pipelines using synthetic bootstrapping and semantic chunking.
- Designed and deployed an accessible mobile interface (Figma, React) to minimize cognitive load for elderly users.

STUDENT ASSISTANT - UNIVERSITY OF TWENTE
NOV 2023 - DEC 2025

- Haptic Sleeve Usability Study: Recruited and conducted user testing for a wearable haptic feedback interface.
- AI Messaging Architecture: Engineered data pipeline and system architecture for a glucose-responsive personalized AI feedback generator.

PRODUCT PROTOTYPING INTERN - RE-LION
SEP 2024 - DEC 2024

- Developed spatial tracking sensor testing protocols across environmental conditions (lighting, area size, user height), building validation tooling to assess VR viability.
- Delivered a feasibility assessment for sensor integration in defense/training scenarios.

JUNIOR BUSINESS ANALYST - VENCHI
DEC 2022 - AUG 2023

- Engineered automated workflows and streamlined internal tool UX (Power Automate, D365) to optimize customer care platforms and enterprise operations.

IT TECHNICIAN - PROVINCIA DI CUNEO
DEC 2021 - DEC 2022

- Managed enterprise hardware deployment and software infrastructure for 300+ user organization.

EDUCATION

MSc INTERACTION TECHNOLOGY
University of Twente, Enschede | 2023 - 2026

BSc COMPUTER SCIENCE
University of Turin, Turin | 2018 - 2022

SKILLS

- **AI & Data:** RAG Pipeline Design, Local LLM & FineTuning, Prompt Engineering, HITL Validation, Dialogue Flow Design.
- **UX & Product Design:** End-to-End Product Design, System Mapping, Figma, Behavioral Analytics, Rapid Prototyping, Usability Testing.
- **Technical Engineering:** Python, JavaScript, React, HTML/CSS, Data-Driven Design, Quantitative UX Evaluation.

PROJECTS

- **Master Thesis:** Local LLM Conversational AI Agent for nutrition assessment (70.6% CUQ, 3.22/5 engagement vs 2.82/5 standard, n=33)
- **Dinner House System:** Automated Ledger & Meal Management App for campus student houses
- **IoT Hardware & Software Ecosystem** for Real-Time Plant Monitoring

INTERESTS

Digital Products • Fitness & Outdoor Sports • Motorsport • Entrepreneurship • IoT Systems • Interior Design
