GIACOMO SPADA

giacomospada.com | LinkedIn profile | giacomospada99@gmail.com

I'm a designer-builder who owns products end-to-end, from initial research and design through to working systems. Focused on conversational AI and interfaces that make complex data usable. Currently building clinical AI for chronic disease management but interested in AIoT tech and automation that solves problems.

WORK EXPERIENCE

JUNIOR SCIENTIST (AI PRODUCT ENGINEER) - ***UNIVERSITY OF TWENTE*** **MAY 2026 - PRESENT**

- Building EMERALD end-to-end, an AI health coach for chronic diseases, on a local LLM (Llama 3.1 8B) and RAG pipeline.
- Designed a two-layer safety system (deterministic rules + LLM router) with 95.8% routing accuracy, catching emergencies at a 3.8% false-refusal rate.
- Built patient memory that updates the profile from conversation with 97.6% accuracy and zero invented conditions, tested with a DeepEval suite of 1,974 labeled messages and 219 clinician Q&A pairs.
- Created a knowledge base of 230+ clinical guideline rules and 29 behavior-change techniques.

STUDENT ASSISTANT - ***UNIVERSITY OF TWENTE*** **NOV 2023 - DEC 2025**

- Haptic Sleeve Usability Study: Recruited and conducted user testing for a wearable haptic feedback device.
- AI Messaging Architecture: Designed a data pipeline and system architecture for a glucose-responsive personalized AI feedback generator.

PRODUCT PROTOTYPING INTERN - ***RE-LION*** **SEP 2024 - DEC 2024**

- Developed spatial tracking sensor testing protocols across environmental conditions (lighting, area size, user height), building validation tooling to assess VR viability.
- Delivered a feasibility assessment for sensor integration in defense/training scenarios.

JUNIOR BUSINESS ANALYST - ***VENCHI*** **DEC 2022 - AUG 2023**

- Created automated workflows and streamlined internal tool UX (Power Automate, D365) to optimize customer care platforms and enterprise operations. Adopted by managers, CEO and CTO

IT TECHNICIAN - ***CUNEO PROVINCIAL GOVERNMENT*** **DEC 2021 - DEC 2022**

- Managed enterprise hardware deployment and software infrastructure for 300+ user organization.

EDUCATION

- **MSc INTERACTION TECHNOLOGY** - **University of Twente**, Enschede | 2023 - 2026
- **BSc COMPUTER SCIENCE** - **University of Turin**, Turin | 2018 - 2022

SKILLS

- **AI & Data**: RAG Pipeline Design, Local LLM & FineTuning, Prompt Engineering, HITL Validation, Dialogue Flow Design.
- **UX & Product Design**: End-to-End Product Design, System Mapping, Figma, Behavioral Analytics, Rapid Prototyping, Usability Testing.
- **Technical Engineering**: Data-Driven Design, Quantitative UX Evaluation. Python, React, HTML/CSS, Javascript (working knowledge)

PROJECTS

- **Master Thesis**: Local LLM Conversational AI Agent for nutrition assessment (70.6% CUQ, 3.22/5 engagement vs 2.82/5 standard, n=33)
- **Dinner House System**: Automated Ledger & Meal Management App for campus student houses
- **IoT** Hardware & Software **system** for Real-Time Plant Monitoring
